

Hi All and once again welcome to our Third on the Farm Bull Sale. It is unbelievable how this time goes by! Did someone take a month out of the year and forget to tell me about it?

This past summer was a blur but one we will never forget. We are committed to the Angus breed and have been all our lives as well as my fathers and grandfathers lives.

This summer Canadian Angus hosted the World Angus Forum in Calgary, Alberta, this event only happens every 4 years around the world and only comes to Canada every 24 years or so. So with this commitment we have, we felt it a must to participate in it somehow!! So plans were made months prior to July to exhibit our program to all of Canada and the World. The event was unbelievable, the setting was gorgeous, the displays were fantastic, the cattle on display were great (something for everyone), the crowds of people were large and enthusiastic from all over the world and the atmosphere was absolutely unbelievable. The organizing committee did so much work and should be congratulated again and again on the job they did! We were fortunate enough to have a very successful show; breeding and owning a small piece of the Reserve Champion Bull at the show and the same bull also was Reserve Champion in the Futurity Bull class. He was the only double winner in the Black Angus show. These few days still seem like a dream for us and our partners and owners of Eastondale Breakaway, Kelly & Angie Feige and their two sons Garrett & Jacob we still pinch ourselves, thinking we are dreaming! I think we now know the feeling of a winning athlete standing on the podium of the Olympic games. Congratulations Feige's on your accomplishment and your selection out of our 1st on Farm Bull Sale. Yes Breakaway was purchased right out of the sale ring that this set of bulls will be sold through! We also had a successful show with females winning three bronze medals. Another success we are very proud of!

Some People say "We will not be able to afford your bulls now", they are for breeders not us the commercial producer! We do not believe that fact at all. There will be affordable bulls for everyone but it does solidify the fact that our product can go into the World market place and stand up with the best of the world and now you can be confident of that fact as you may consider purchasing a piece out of our breeding program.

We exhibited two of our herd bulls at the Forum and they are sires of some of the cattle on offer, both B Hills FRL Duration 606S and Lockout Huck 25T had lots of favourable comments from visitors who passed by our display.

We are always striving to improve our cowherd and the mothers of your possible new herdsires. The bull calves are not creep fed at any point in their lives, we do not want to a mask anything that may alter our product or give you a result that may cause dissatisfaction. We do have a group of two year old bulls this year and yes I will be up front with you, five of these bulls were available in last years yearling offering but their was just not enough buyers for all the bulls last year. We cut the heads off half that passed through and kept this group as we felt they had to many things to offer to be slaughtered as well. We are glad we did this as we were able to see how they continue to grow and how well their feet continue to stay in shape. This exercise reaffirmed our confidence in our yearling product.

Another new option this year is a small handful of open replacement females. This group was a random selection out of a group of 40 heifer calves we held for replacements. We will keep and breed any of these females to any of our bulls if you so choose and then would be moved to you after breeding season.

Please feel free to contact us anytime to ask questions about bulls or females. We want your questions to be answered. And if you would like to visit the bull pen before sale day, we would be very happy to show you through.

Once again this year we enjoyed working with our Guest Consignors Clint & Shelli & Georgia Oxtoby. They have a small but very good offering of yearling bulls this year.

We look forward to meeting you on Sale Day MONDAY APRIL 5, your interest in our program is truly valued!

Sincerely Dale, Shelly and Erika Easton

P.S. Our sale barn is heated but the bulls are penned outside, so please dress accordingly!

ERIKA BEING PRESENTED THE CWA SCHOLARSHIP. SHE ALSO RECEIVED THE CANADIAN JUNIOR ANGUS SCHOLARSHIP, CONGRATULATIONS TO ERIKA AND CONTINUE THE GREAT WORK DOWN THE ROAD.

An ET calf out of the great Forever Lady 9136 cow! This flush was a tremendous success with 9 embryos produced and 9 implanted and 9 resulting in calves, 6 females and 3 males and this being one of them. He is a stylish, correct calf that would work on heifers and cows. Tommy 03'09 is sired by the very popular Canadian bred Figure 8 Tommy Boy 509R, who sold for 60,000 for 1/2 interest in the 2007 Masterpiece Sale.

A larger framed bull calf compared to his full brother. He has tremendous length and testicle development. His 6 full sisters are so consistent and everyone who has seen them admires that quality. Choice of the full sisters sold through the Masterpiece Sale for 5100.00 to Tom Neausteder and Darin Bouchard of Manitoba. You can ask them, I think they are having a tough time choosing which one they might want.

A very strong herd bull candidate here!!!! He does have a look and a presence to him. Moneymaker 23'09 is sired by Stevenson Moneymaker R185. We were one of the very few breeders to secure some semen out of Moneymaker R185. Thanks to Brad Devine of Thunder Creek Angus, based just west of Moose Jaw! Brad has been very progressive in his quest for new genetics and acquired the Moneymaker bull from the great Stevenson program out of Montana. I was fortunate enough to talk Brad out of a few straws to flush the Forever Lady 9136 cow and these two calves are a result of that acquaintance. Thanks Brad. Eastondale Money maker 23'09 is a paternal brother to Remington's Moneymaker that was so popular at the World Angus Forum embryo display and then went on to sell for \$34,000 to K-Deen Angus of Wetaskiwin, Alberta. Remember he is a maternal brother to a number of the great working bulls, Iceberg, Breakaway, Exhale, All The Way and this guy may be the next bull on the list.

Another ET Moneymaker son out of Forever Lady 9136 cow! He did not have as good a receipt cow as some of our other ET calves, consequently he suffered because of that. Not his fault! But he has really moved forward in the past months. He still has the genetics inside of him that can make a difference to any herd commercially or seed stock.

Max 533 has maybe been a little under rated in the past but he is sure changing that status! He puts a definite stamp on every calf he sires. His sire group can easily be picked out in both the bull and heifer pens. The sons are consistently deep sided above average performance and very good testical development. His daughters are very feminine through the front end, yet carry depth throughout the middle and rear flank. We have calved his first larger set of daughters this spring, the udders are very nice and they themselves seem to be staying in adequate flesh. Study the Max sire group in both the Male and female division of our offering. They have a lot to offer a cattleman who may want efficiency in their cattle.

This bull continues to impress us; he carries a great set of EPD's with him that can match any of the bulls in the glossy semen catalog! His calves have been very good in both the male and female sides. We have calved his first daughters this year and his daughter's udders will give you a definite WOW impression. We displayed Duration at the World Angus Forum in Calgary this past summer and he had a ton of admirers. People loved his depth of body, his muscle expression and in his class he maybe wasn't the heaviest bull in the mature class but was commented on that he was the freest moving and best footed bull in the class but these are traits that are really needed in the real world of the BEEF BUSINESS! We have been AI'ing some of our heifers to Duration, as he continues to show light birth and calving ease! Duration another very good herd bull we are so glad to own a piece of.

This is our first set of Huck sons that we have ever offered. He was the high selling bull that we acquired out of the Lookout Stock farms bull sale in 2007. Huck is a straight Canadian bred bull, who is in a moderate package but displays lots of natural thickness and depth of body. He displays a great traditional Angus head that we have lost in so many of the modern day Angus bloodlines. We hope to have this herd sire on display sale day! So make sure you check him out!

This Max 533R son, I really like. He has a nice amount of performance in him in a very correct complete package. You will pick him out in the pen every time you walk through it. His Dam has been very productive here. A calving ease son of hers sold through our other bull sale to Murray Wolfe of Grenfell, Sask. And a daughter is working in Johnson Livestock's herd and also raised a bull that sells in their sale. 46M has a beautiful udder that will last a longtime. If you haven't purchased a Max son from us yet, this would be one I would rate as one to look at.

Erika's bull here and we believe she's offering a good one here. He is so stylish and has thickness on top of that. His dam was Erika's 4-H female project and she herself had great success in the ring for Erika. She has a beautiful udder make up. Erika has a full sister to this bull who she has also competed in the show ring with great success. In fact she was a double bronze medalist at the World Angus Forum, placing in both the open and Jr. Shows at Calgary. If you come to see the bulls, make us show you her now, she is very good with a super udder and a great bull calf at her side already. This Max son will rank up very high on sale day.

One of those Max X Iceberg combinations in this lot! The dam of this bull was also the dam of one of our most popular bulls in last year's sale. He sold for \$4200.00 to a couple of very very good commercial operations who will use the bull in partnership, Keith Bourhis and Bob Brickley both of Kennedy, Sask. We think allot of the cow family behind this calf. His dam, grand dam, and great grand dam have all been ringing the bell. He too would be a good choice for servicing a package of heifers.

This is a bull that has been a stand out all his life!
One would have to describe him as a tank! His personality is another thing one has to notice, very mild and easy to work with. His dam is one of those very good Bando 9074 daughters that have worked so well for us. We showed her as a pair at CWA along with her first bull calf who was one of our high selling bulls in our sale in 2007, selling to Owen & Bryce Mawbey of Unity, Sask. for \$5900.00. This calf would be one that I will rank as one of our best in this year's bull calf crop.

This calf has a lot of style and has some hip structure to go with it. His Hero dam is a typical daughter, hard working and bound to stay in the herd for a number of years. He may have a little more birth weight but when you calve in April and May that number is guaranteed to soon be forgotten.

Definitely a calf I will rate very high anytime you talk about bulls that I like in the pen. He has a herd bull look to him with good depth of body and flank, and has a super leg structure. His dam is our only New Frontier 095 daughter and she is a good one, in fact we just sold a full sister in the highly respected Keystone Classic Sale held in Brandon, Man. every fall. VK 81N is a really nice cow that appeals to your eye in every season of the year. I realize we are offering a maternal sister to 81N in our open female offering, I guess one can't keep them all!

We are calving our biggest set of Dryland Max 533R daughters this spring and are extremely happy with the outcome. They have good udder qualities and ample milk but then why wouldn't they when they are sired by a bull out of Geis Maximum 80'01 and N Bar Emulation EXT up close in the pedigree. A calf here that would work on cows as well as larger framed heifers!

A stylish yearling bull that shows an adequate amount of muscle expression and is very correct in his structural make up. His full brother is our big power bull in the two-year-old section. If one wants a very consistent set of commercial calves to sell in the fall then keep 103'09 and his big brother 15'08 together and put them in your breeding fields.

We have always admired the Main Event cattle, the good qualities that they have put into the Angus breed. So we went out and purchased a Main Event sired calf from one of the herds where he has excelled, the Minburn Angus herd of Minburn, Alberta. The Warrilows have one of the superior cowherds in the nation and Main Event has been a big part of that breeding program. This is the first small set of sons sired by the bull we purchased in 2007, where 38T was one of the high selling bulls in the Minburn sale. This sale lot also has the Mayflower cow family that we hold in high regards. In fact she has produced 2 other sons to sell through our sale ring. One selling to very good repeat customers of ours, Marlowe and Pam Brown and another to Sunny Grove Angus of Radville, Sask.

A Main Event son with a nice birth weight and a great Leachman Right time dam! Commercial men you want to keep replacement females or sell replacement females, this bull in our offering would be one that I would highly recommend.
